

# Baseline Testing Clinic for Concussions

Hosted by Dr. Brent O'Reilly at LiveWell4Life Inc.

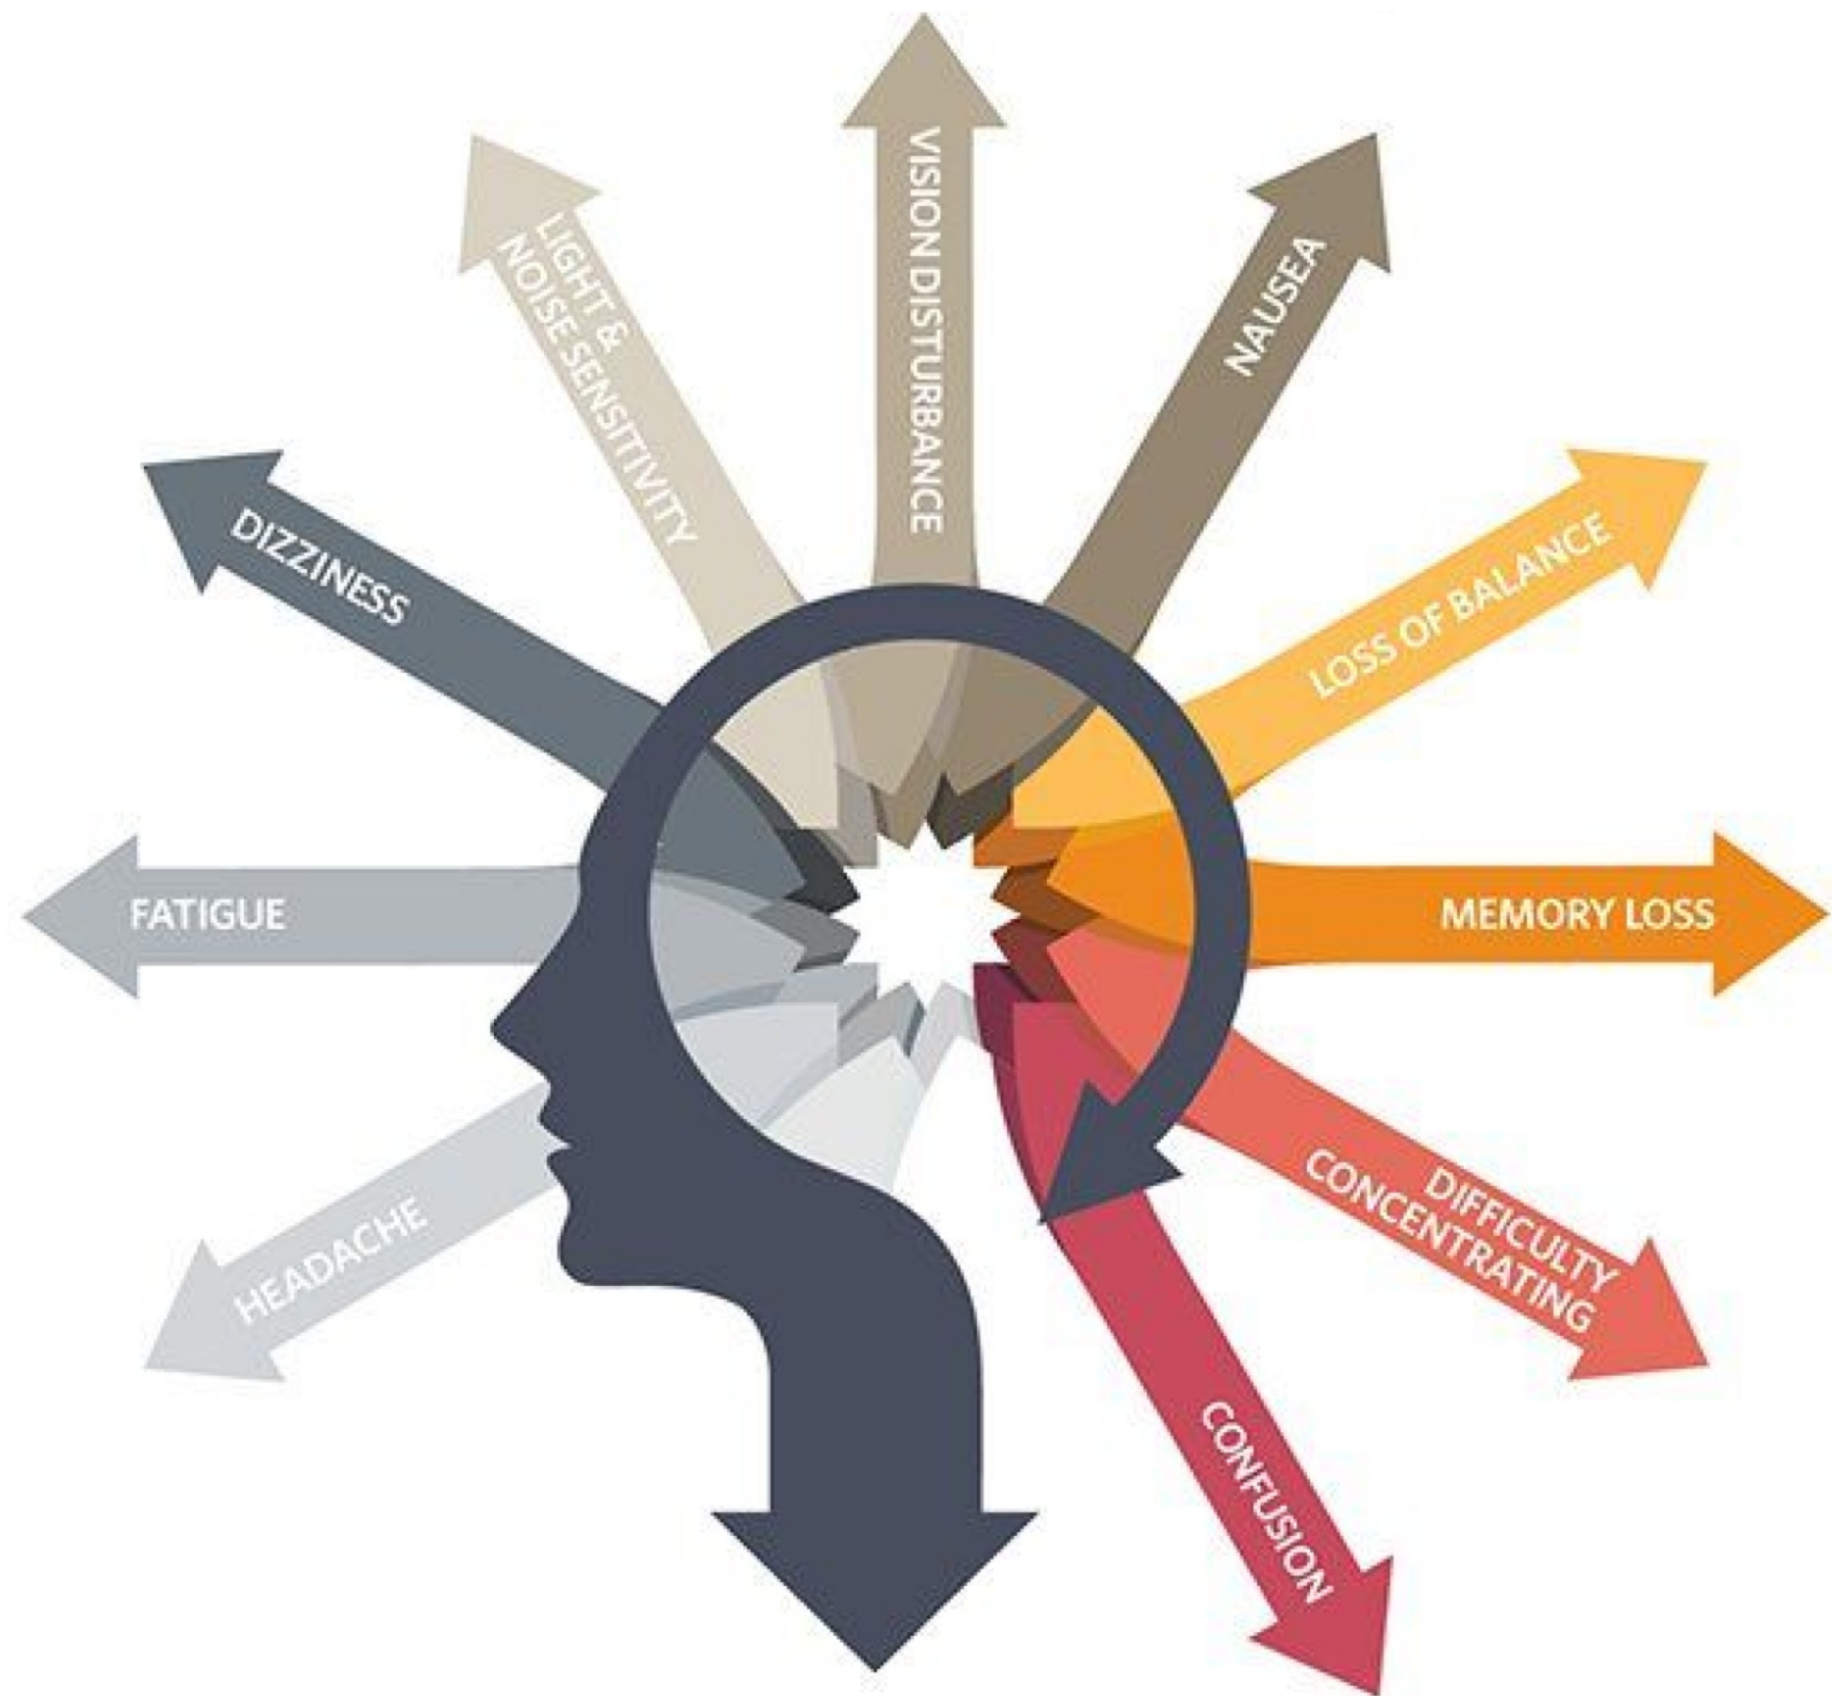

October 12th from 6-9pm

Baseline testing can be used as an assessment tool to measure your level of brain function post-concussion, and to help track progress during recovery. Having this information prior to a concussion can assist in creating an effective rehabilitation plan. The test takes about 30 minutes.

**Cost:** \$10/person

Spaces are limited, so please call in advance to reserve your spot.
